

MIRAI

LET'S GO  
BEYOND  
ZERO

## BREAK THROUGH BARRIERS AND GO BEYOND

Leading the hydrogen generation, the hydrogen-powered new Toyota Mirai fuses leading technological innovation with sleek style and dynamic drive, leaving only water behind. Purifying the air taken in to the fuel cell system as you drive, the Mirai goes beyond zero, protecting our precious planet for a brighter future. Sit back in total comfort and discover the power of hydrogen.

*"We have pursued the goal of making a car that customers will feel they want to drive all the time, a car that has an emotional and attractive design and the kind of dynamic and responsive performance that can bring a smile to the driver's face."*

Yoshikazu Tanaka, Chief Engineer New Mirai

# STRIKING DESIGN, EFFORTLESS PERFORMANCE

Refined design meets excellence in performance. With its sporty stance and dynamic proportions the new Toyota Mirai leaves a lasting impression, showcasing the power of hydrogen with exceptional flair. Built on a whole new platform with longer wheelbase, the car is wider and lower. This gives a reduced feeling of gravity and delivers maximum stability. The longer rear overhang completes the aerodynamic feel. Outstanding 19" or 20" alloys add to the final touch. Every aspect has been carefully designed from the new sloping roofline to its stylish profile to deliver looks and efficient performance. Enjoy every journey in premium style as you discover scenic skyline views through the panoramic rooftop.

# 650 KM OF PURE ENJOYMENT

The new Toyota Mirai is full of innovations designed to maximise the driving experience. The handling is fantastically intuitive, courtesy of a responsive rear-wheel drive system. This combines with acceleration of 0–100 km in 9.0 seconds and exceptional Hydrogen Fuel Cell performance (combined system producing 182 Hp).

The Mirai provides a remarkably quiet drive, with unparalleled ride comfort, agility and responsiveness, also when cornering. Revolutionary Hydrogen Fuel Cell technology delivers true 0-emissions motoring, with 650 km of extensive driving range so you can enjoy the open road, worry free. With the new Mirai, every journey is full of feeling – inspiration, exhilaration and enjoyment.

Three different driving modes with Drive Mode:  
ECO to control fuel consumption,  
NORMAL for a standard driving experience or  
SPORT for a sharper response.

Efficient Hydrogen Fuel Cell technology takes you on an exhilarating drive. Toyota Mirai takes you beyond zero.

5  
MINUTES REFUEL TIME

650  
KM RANGE

0  
EMMISSIONS

1  
ELECTRIC RIDE

**ADVANCED TO ITS CORE**

1. Refuelling is simple. Filling up the Mirai takes up to five minutes. It is much like filling a conventional car. The pump does all the work. Simply connect the nozzle and squeeze the handgrip, securing it in place. Mirai's computer sends information to the pump, filling the tank safely and fast.

2. The next generation fuel cell produces electricity instantly, as a 100% electric powerhouse. With increased tank capacity, you can enjoy a 650 km driving range. The Fuel Cell Monitor keeps track of how much power is used, as well as how residual energy is captured to charge the battery.

# CLEANER AIR, WHEREVER YOU DRIVE

“I don’t know how many years it’s going to take us, but I want Toyota to come up with the dream car – a vehicle that can make the air cleaner than it is,” said Katsuaki Watanabe, former president of the Toyota Motor Corporation, in 2007.

The Mirai is the result of this visionary ambition at Toyota. This hydrogen-powered car is future proof, only emitting a few drops of water as fuel cell technology does not create any tail-pipe emissions.

Moreover, in the Toyota-first Air Purification System the air taken into the fuel cell flows through the activated charcoal filter which captures small dust particles and harmful pollutants such as sulphur dioxide and nitrogen oxide. As such, the air leaves Mirai cleaner than when it went in. Mirai makes the air cleaner as it goes.

Every year, an adult breathes approximately 4,730,400 litres. Every 10,000 kilometres, the Mirai cleans the same volume of air.

#### BETTER FOR EVERYONE

Thanks to the Mirai's impressive multimedia touch screen, you can see how much air you're purifying in real time as you drive. Track your current journey as well as the total volume of air you've cleaned since getting the car – all at a glance on the dashboard.

A lowered driving position increases headroom and legroom, offering an extremely comfortable seating position.

# SUPREME COMFORT AND SPACE

The Toyota Mirai invites you into pure luxury. Bold, striking features contrast with a discrete design in a wide and spacious cockpit. Utmost attention to ergonomics delivers a comfortable driving position. Clear and harmonising, with all controls within easy reach, the dashboard is designed to increase your interior space. Choose between premium silver or copper inserts and journey in supreme comfort with the textured leather seats.

LARGE SUITCASE  
BOOT SPACE

1

COMFORTABLE DRIVE

---

Maximised space furnished with a wealth of luxurious touches makes the Mirai incredibly comfortable.

**MORE SPACE TO RELAX**

1. Up to 85 mm longer, the new Mirai offers enhanced rear legroom and heated and ventilated seats. Elevate your mood with eight ambient lighting modes as your journey fades from day to night.

2. The conveniently located instrument panel in the rear armrest allows the rear passengers to adjust the temperature of the air conditioning to heat or cool individual seats. With full rear audio control through the integrated multimedia system everyone's journey is enhanced.

A photograph showing the interior of a car from the driver's perspective. The dashboard is dark with a blue ambient light strip. The windshield shows a view of a residential street with a brick house and greenery. A white projection is visible on the windshield, likely representing the Head-Up Display mentioned in the text.

With the extra-large Head-Up Display projected onto the windshield, you can see your next direction, road signs, speed warnings and monitor your road position with Lane Trace Assist.

# INNOVATION AT YOUR FINGERTIPS

Whether on a work commute or longer adventure, the Toyota Mirai gives you complete control with high-end technology at every turn. The driver's 8" full-colour LCD display lets you track your speed, fuel and other important information at a glance.

Just one tap on the extra-large 12.3" multimedia touch screen allows the journey to wrap around your preferences with access to smartphone integration features like Apple CarPlay™ and Android Auto™ or choose intelligent voice recognition to seamlessly enhance your driving experience. And you can stay fully charged with wireless phone charging.

**SEE CLEARLY FROM  
EVERY ANGLE**

1. Keep everything in sight as you park with the intelligent Panoramic View Monitor. Four cameras work together with 12 clearance sonars to ensure the Mirai recognises objects and people in 360 degrees.

2. Mirai's digital rear-view mirror ensures you keep sight of what's behind you even if luggage or passengers are blocking the rear windshield. The extra-wide viewing lens provides a clear and sharp panoramic view.

# TOYOTA'S MOST ADVANCED PARKING SYSTEM

Sit back and enjoy Toyota's Europe-first Teammate Advanced Park. This fully automated parking system takes control of your steering, pedal and shift systems, and eases to a stop wherever you choose. Parallel park and reverse park – even at night – and automatically drive out of a space, all at just a touch. Let the Mirai do the work for you with three pre-programmable parking spaces as your car gently manoeuvres into your home or work parking spot.

# KEEPING YOU TWO STEPS AHEAD

With the new Mirai, intuitive technology makes all journeys safe. On the open road, you can rely on Intelligent Adaptive Cruise Control. In busy urban areas, the Pre-Collision System supports at intersections and helps you watch out for pedestrians and cyclists. Rear Cross Traffic Alert allows you to reverse out of a parking space safely by detecting other vehicles, objects or pedestrians in your blind spot and by alerting or braking to prevent or mitigate a collision. Blind Spot Monitor detects cars approaching from behind providing a warning indicator in the side mirror. Lane Departure Alert and Lane Trace Assist keep you on track. As light fades to dark, night vision is enhanced by Adaptive High Beam System doing all the work, brightening and dimming your headlights, illuminating only the required areas.

### TECHNOLOGY THAT READS THE ROAD FOR YOU

1. The Mirai's intelligent Pre-Collision System looks out for pedestrians, cyclists and intersection hazards with alert, brake assist or automatic braking. Emergency Steering Assist supports the driver with steering while keeping vehicle stability.

2. Road Sign Assist monitors traffic signs, showing essential information in clear view on the cockpit display. In combination with Intelligent ACC, speed can be easily adapted based upon traffic signs.

Image for illustrative purposes only; showing a combination of different safety features. See our website for more information on the full functionality of Mirai's safety features.

# PREMIUM

## GRADE

### Main features

- 19" gloss silver alloy wheels (5-double-spoke)
- Bi-LED headlamps with Adaptive High Beam System (AHS)
- Reverse-gear tilting door mirrors
- Water-repellent and Super UV protection front side glasses
- Privacy glass
- Ambient lighting (8 colour illumination)
- Black synthetic leather seats
- Heated leather steering wheel
- Electrically adjustable tilting and telescopic steering wheel
- Electrically adjustable and heated front seats
- Dual zone automatic air conditioning
- Rain sensor
- Electrochromatic rear-view mirror
- Smart Entry & Start System
- Intelligent front & rear parking sensors with automatic braking
- Blind Spot Monitor (BSM)
- Rear Cross Traffic Alert (RCTA) with Brake Assist
- Panoramic View Monitor
- Wireless mobile phone charger
- Toyota Touch® 2 multimedia system (with 12,3" screen)
- Toyota Touch® 2 & Go navigation system
- Mobile Integration (Apple CarPlay & Android Auto)
- JBL Premium Sound System, 14 speakers
- 8" colour TFT multi-information screen
- Toyota Safety Sense
- Adaptive Cruise Control (ACC)

Bi-LED headlights with Adaptive High Beam System enable and disable individual LEDs within each headlamp for precision control.

# AMBASSADOR

## GRADE

### Main features (additional to Premium)

- 20" black alloy wheels (20-spoke)
- Black roof
- Panoramic sunroof
- Black or white semi-aniline leather seats
- Heated rear seats
- Ventilated front and rear seats
- Memory function on driver seat
- Memory function on steering wheel
- Three-zone automatic air conditioning
- Multi-function control panel in rear armrest
- Digital rear-view mirror
- Teammate Advanced Park
- Multi-colour Head Up Display (HUD)

Mirai Ambassador grade is available with a choice of black leather with silver details or white leather with copper details.

CHOOSE  
YOUR OWN  
STYLE

# HYDROGEN EXPLAINED

How does Mirai work? The fuel cell (1) produces electricity by bonding hydrogen, stored in the three tanks (2) under the Mirai, with oxygen from outside. This powers the electric motor (3) and charges the battery (4).

## Q1.

**WHAT IS HYDROGEN?**

Hydrogen is the most abundant element in the universe and can be found in almost anything. In fact 75% of the universe's mass is Hydrogen. It exists naturally as a molecule in nearly all living things and is a colourless, odourless non-toxic gas which can be stored over long periods.

## Q3.

**WHAT IS A FUEL CELL VEHICLE?**

It is an electric vehicle that uses an electric motor, with electricity being produced on the spot by the fuel cell stack. Hydrogen powered vehicles are better for the environment since they emit no harmful gases or other pollutants whilst driving – only water. A new, sustainable way to travel, hydrogen can also be supplied from renewable energy resources.

## Q5.

**IS THERE ANY FUTURE IN DRIVING HYDROGEN?**

Yes, the age of hydrogen is here. With continuous development and engineering, hydrogen fuel cells are emerging into the mainstream. A sustainable fuel source, expect to see hydrogen energy more and more as the network of charging stations is growing rapidly.

## Q2.

**WHERE DOES HYDROGEN COME FROM?**

Most commonly, hydrogen exists naturally in water and biomass and can be extracted by electrolysis using renewable resources such as wind, solar or hydro power, which is why it offers us energy diversity and continuity.

## Q4.

**WHAT OTHER APPLICATIONS DOES HYDROGEN HAVE IN INDUSTRY?**

Hydrogen has been produced, stored and used for power for more than 100 years. From hot air balloons, to fuelling a variety of vehicles. From creating fertilisers and even powering NASA's rockets since the 1950s, hydrogen has many different uses. In addition to transportation Hydrogen is widely used to power factories, refrigerate warehouses and even heat homes.

## Q6.

**WHAT AMBITIONS DOES TOYOTA HAVE FOR HYDROGEN?**

Mirai brings the ultimate energy efficiency of the hydrogen fuel cell. But we're not done yet, the Toyota Hydrogen Society in Europe is changing the face of transport by moving towards a hydrogen based society. From hydrogen heated homes, to the hydrogen powered Toyota Mirai, Toyota is committed to protecting our global environment for generations to come and going Beyond Zero.

**HYDROGEN MYTHS BUSTED**

**Refuelling a hydrogen car is more difficult than a petrol car.**  
False. The same way as you use a petrol pump, refuel in under 5 minutes at a hydrogen station.

**Hydrogen is difficult and expensive to produce.**

Viewed as an industrial commodity today, hydrogen is readily available from a variety of natural sources.

**Fuel cells are expensive and will never make it mainstream.**

Since 2007, fuel cell prices have already halved. With increasing development, expect to see hydrogen fuel cells everywhere.

**Hydrogen is not safe.**

False. Hydrogen tanks are made of carbon fibre and are thoroughly tested. They are just as safe as other vehicle fuels like diesel and natural gas.

**Hydrogen is a new fuel source.**

False: Hydrogen has been used in industry for many years as a source of fuel for buses, forklift trucks, boats and even rockets.

# ACCESSORIES

## 1. WHEEL LOCK NUTS:

Made of hardened steel with a rounded profile and coded key to maximise alloy wheel anti-theft security. The look complements your existing wheel nuts.

## 2. ASHTRAY / SMALL BIN:

A smart black finish ensures that the ashtray co-ordinates perfectly with the interior of your car. It fixes neatly in the central cupholder and can be easily removed for emptying and cleaning. The lidded design is very effective in preventing the spread of ash and helping to contain odours. Can also be used as a bin for small items.

## 3. TEXTILE FLOOR MATS\*:

Stylishly protect your car's cabin carpets. Safety fixings hold the driver's mat firmly in place.

\* Standard equipment on all grades.

Medium speed (kg/100km)	0.64-0.70
High speed (kg/100km)	0.69-0.76
Extra high speed (kg/100km)	1.04-1.17
Fuel tank capacity (kg/litres)	5.6/142.2
Number of tanks	3
<b>Sound level (applicable legislation)</b>	
Sound level drive by (dB(A))	64.0

The fuel consumption and CO<sub>2</sub> values are measured in a controlled environment on a representative production model, in accordance with the requirements of the new WLTP European Regulation EC 2017/1151 and its applicable amendments. For each individual vehicle configuration, the final fuel consumption and CO<sub>2</sub> values may be calculated based on the ordered optional equipment. The fuel consumption and CO<sub>2</sub> values of your vehicle may vary from those measured or calculated values, as driving behaviour as well as other factors (such as road conditions, traffic, vehicle condition, tyre pressure, load, number of passengers, etc.) have an influence on a car's fuel consumption and CO<sub>2</sub> emissions. For more information regarding the new WLTP test method, please visit: <https://www.toyota.lt/world-of-toyota/feel/environment/worldwide-harmonized-light>

TOYOTA  
ENVIRONMENTAL  
CHALLENGE 2050

# FOR A CLEANER WORLD

At Toyota, we want to go beyond zero environmental impact and leave the world in a better place than we found it. To make that happen, we have set ourselves six challenges to complete by 2050. Each one presents its own difficulties, but we are committed to generating a positive and sustainable impact on society and the natural world as a whole.

For more information regarding Toyota Environmental Challenge please visit:  
<https://www.toyota.lt/world-of-toyota/feel/environment/environmental-challenge-2050.json>  
or contact your local Toyota retailer.

## CHALLENGE 1

### NEW VEHICLE – ZERO CO<sub>2</sub> EMISSIONS

By 2050, we want to reduce the CO<sub>2</sub> emissions from our vehicles by 90% compared to our 2010 levels. To achieve this, we will promote the development of new vehicles with low or zero carbon emissions, and do everything we can to increase the uptake of these vehicles.

## CHALLENGE 4

### MINIMISING AND OPTIMISING WATER USAGE

To minimise water usage, we have started to collect rainwater at our manufacturing plants. We have also developed purification methods so that the water we do use can either be used again or returned safely into the local supply.

\* Toyota's LCA methodology, which is applied to our passenger vehicles, was reviewed and approved by TÜV Rheinland and has been certified to comply with ISO14040/14044 standards.

## CHALLENGE 2

### LIFE CYCLE – ZERO CO<sub>2</sub> EMISSIONS

We are working to create more environmentally friendly designs – and then analysing and refining them to ensure the lowest possible environmental impact throughout the vehicle's entire life cycle\*.

## CHALLENGE 5

### ESTABLISHING A RECYCLING-BASED SOCIETY AND SYSTEMS

We've been working on the challenge of resource recycling for 40 years, with the result that 95% of every Toyota Mirai is now reusable and recoverable. In addition, we offer new and innovative ways of returning your vehicle when it eventually reaches 'the end of the road'.

## CHALLENGE 3

### PLANT – ZERO CO<sub>2</sub> EMISSIONS

To reduce carbon emissions at our manufacturing plants, we are focusing on improving the technologies we use and switching to alternative power sources. We are committed to making our facilities more energy-efficient and adopting renewable energy sources such as solar and wind, as well as low-carbon power such as hydrogen energy.

## CHALLENGE 6

### ESTABLISHING A FUTURE SOCIETY IN HARMONY WITH NATURE

To preserve and enhance our co-existence with the natural world, we are organising reforestation and tree planting, green urban schemes and other environmental initiatives, both at our own sites and in the wider world. Our aim is to establish a society where people and nature coexist in harmony.

An aerial photograph of a winding asphalt road that curves through a dense forest. The road is dark grey with white lane markings and is surrounded by a variety of trees, including tall evergreens and smaller deciduous trees with some autumn-colored foliage. The overall scene is lush and green, with the road providing a clear path through the natural landscape.

YOUR COMPLETE  
PEACE OF MIND  
WITH TOYOTA

## QUALITY SERVICE

Your Toyota will need a Health & Safety check at least once every 2 years/30,000 km (whichever comes sooner). An intermediate check is necessary every year or 15,000 km.

## LOW MAINTENANCE COSTS

All Toyota vehicles are designed and engineered to minimise your maintenance costs.

## GENUINE PARTS

Providing the reassurance of Toyota quality, only genuine and approved components are used on your vehicle.

## ADDED SECURITY

Toyota's comprehensive security system withstands the insurance industry's rigorous 5-minute attack test.

## TOYOTA EURO CARE

Enjoy peace of mind driving with complimentary Toyota Eurocare roadside assistance in 40 European countries.

## GENUINE ACCESSORIES

Toyota accessories are designed and manufactured with the same care, quality and attention to detail as Toyota vehicles. All accessories are covered by a 3-year warranty when purchased together with the vehicle\*.

\* Check with your retailer for specific warranty details.

A perspective view of a paved road winding through a dense forest of tall evergreen trees. The image has a motion blur effect, suggesting forward movement. In the center of the road, a large, circular tunnel of water is formed, with water splashing and spraying outwards, creating a frame through which the road continues into the distance. The sky is a clear, bright blue. The overall scene is vibrant and dynamic.

LET'S GO BEYOND ZERO

## TOYOTA. BREAKING THROUGH BARRIERS AND GOING BEYOND.

Zero isn't our destination. It's another step in our electrification journey that began in 1997 with Hybrid and continues with Plug-in Hybrids and Battery-Electric vehicles. We made Hydrogen-powered cars. We've even brought Hydrogen power to boats, buses and trucks that leave nothing behind but water. From low emissions to zero restrictions, from greater mobility to a better society for all. Why stop at zero, when you can go beyond?

# TOYOTA MIRAI

## GO BEYOND ZERO
